

Brookmont Capital Management

Brookmont Capital Quality Growth Strategy

June 2025

Firm Overview

Founded in 2007, Brookmont Capital Management is an award winning, employee owned, SEC Registered Investment Advisor (RIA) based in Dallas, Texas that is led by Ethan Powell, CFA and Neal Scott.

As an organization, we emphasize integrity, loyalty, transparency, conservatism, thorough research, collaboration and proactive client communication. These core tenets along with our dividend investment philosophy guide us towards our overarching objective: achieving excellence in asset management to the benefit of our clients.

All strategies are managed with strict adherence to the firm's dividend investment philosophy which contends that a selective, low turnover strategy focused on investing in high quality dividend paying companies for the long term is the best means to achieve better than market returns with less than market risk. This investment philosophy has been the driver behind the portfolios' strong long term performance.

Drawdown

Since Inception 1/1/2015

Quality Growth Strategy

Portfolio Overview

- A total return portfolio of 30-50 individual common stocks
- Companies that display sustainable cash flow growth
- Potential for long-term capital gains with lower volatility and downside risks
- Typical holding period is 3-5 years or even longer
- Maximum individual weighting of 5% or 1.25% above the company's weight in the benchmark.

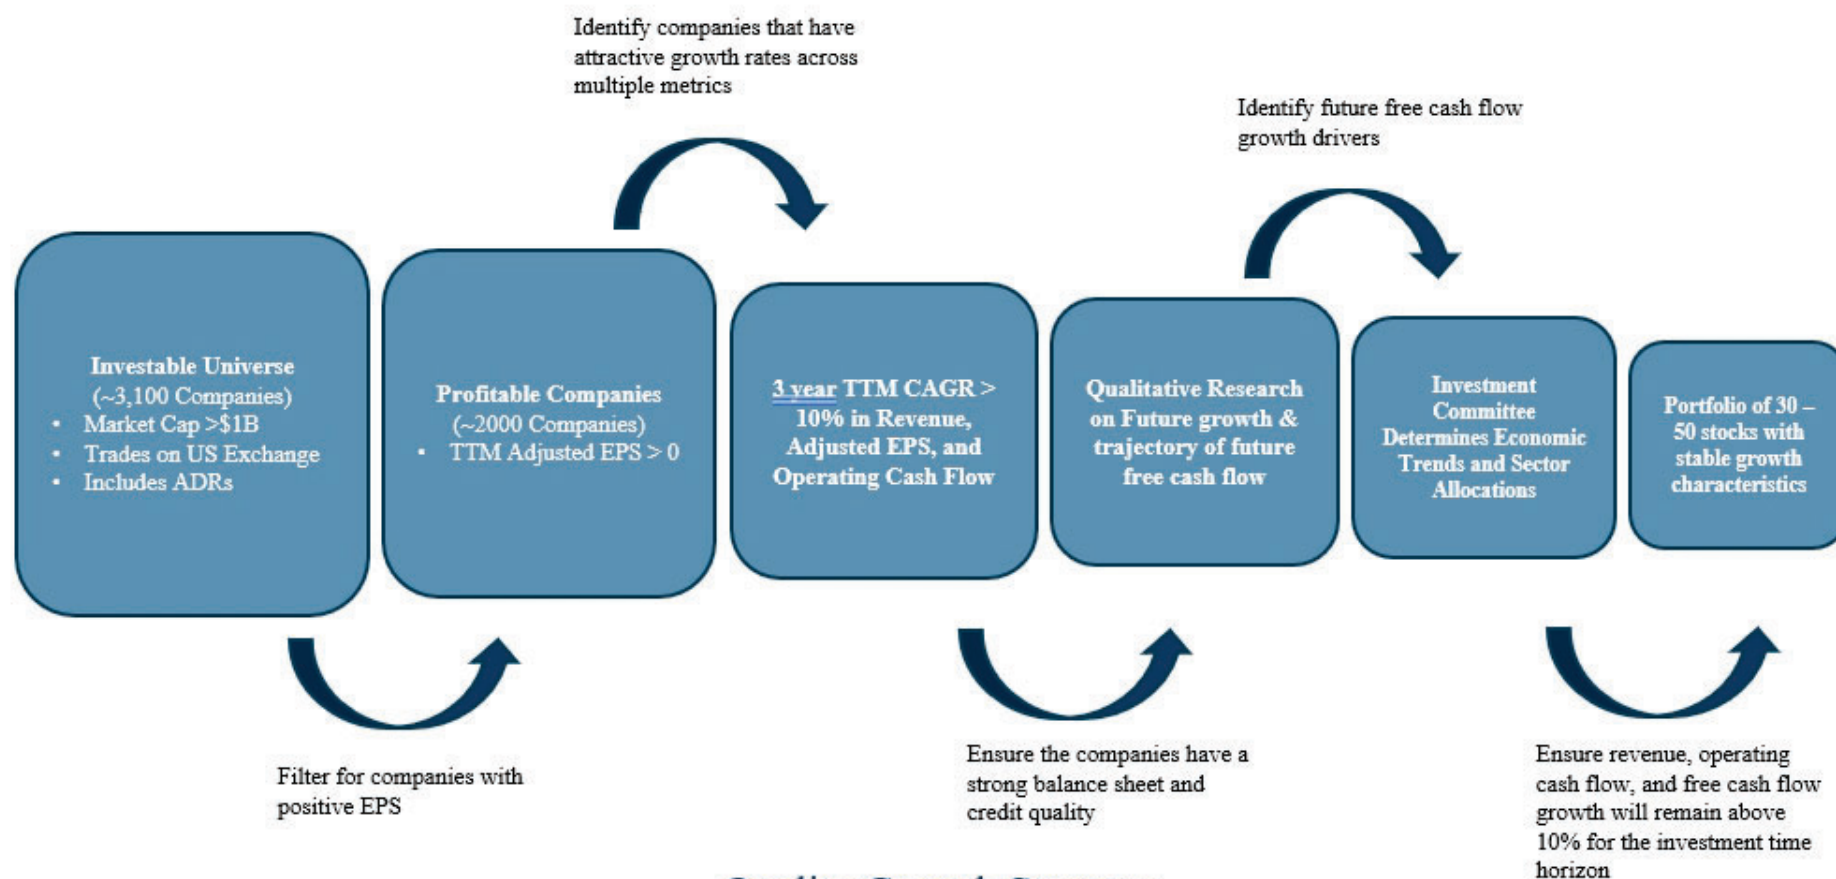

Portfolio Structure

- Typically between 30-50 holdings
- Maximum individual weightings of 5% or 1.25% above the company's weight in the benchmark
- Strategy typically invests in the majority of the market as defined by GICS
- Low internal correlation between holdings
- Low turnover; typically 5%-20%
- +/- 5% of sector benchmark weighting

This letter may contain "forward-looking statements" which are based on Brookmont's beliefs, as well as on a number of assumptions concerning future events, based on information currently available to Brookmont. Current and prospective clients are cautioned not to put undue reliance on such forward-looking statements, which are not a guarantee of future performance, and are subject to a number of uncertainties and other factors, many of which are outside Brookmont's control, and which could cause actual results to differ materially from such statements. All expressions of opinions are subject to change without notice.

Brookmont Capital Management is a registered investment advisor that invests in domestic and global securities. Brookmont Capital Management is defined as an independent investment management firm that is not affiliated with any parent organizations.

Certain economic and market information contained herein has been obtained from published sources prepared by other parties, which in certain cases has not been updated through the date of the distribution of this letter. While such sources are believed to be reliable for the purposes used herein, Brookmont does not assume any responsibility for the accuracy or completeness of such information. These individual securities do not represent all of the securities purchased, sold, or recommended for this Brookmont portfolio and the reader should not assume that investments in the securities identified and discussed were or will be profitable. A complete description of Brookmont's performance calculation methodology, including a complete list of each security that contributed to the performance of this Brookmont portfolio is available upon request.

The Brookmont Quality Growth Strategy returns are based on an asset-weighted composite of discretionary accounts that include 100% of the recommended holdings. Individual accounts will have varying returns, including those invested in the Strategy. The reasons for this include, 1) the period of time in which the accounts are active, 2) the timing of contributions and withdrawals, 3) the account size, and 4) holding other securities that are not included in the Strategy. Dividends and capital gains are not reinvested. The Strategy does not utilize leverage or derivatives. Returns are based in U.S. dollars. The inception of the Strategy is January 1, 2015.

The Brookmont Quality Growth Strategy Composite contains fully discretionary accounts with similar value equity investment strategies and objectives. For comparison purposes, the Quality Growth Strategy Composite is measured against the Russell 1000 Index. The Russell 1000 Index measures the performance of the large-cap value segment of the U.S. equity universe. It includes those Russell 1000 companies with lower price-to-book ratios and lower than expected growth values. The Russell 1000 Index is constructed to provide a comprehensive and unbiased barometer for the large-cap value segment.

Brookmont's returns do include reinvestment of dividends and are shown gross-of-fees. All transaction costs are included. The Russell 1000 cumulative return includes reinvestment of dividends and capital gains. During a rising market, not reinvesting dividends could have a negative effect on cumulative returns.

Gross returns will be reduced by investment advisory fees and other expenses that may be incurred in the management of the account. Net-of-fees performance was calculated using actual management fees. Additional information regarding the policies for calculating and reporting returns is available upon request.

Your account returns might vary from the composite's returns if you own securities that are not included in the Strategy or if your portfolio dollar-cost averaged into the Strategy during the reporting period.

The firm maintains a complete list and description of composites, which is available upon request. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite policy requires the temporary removal of any portfolio incurring a client initiated significant cash inflow or outflow of at least 15% of the portfolio assets. The temporary removal of such account occurs at the beginning of the month in which the significant cash flow occurs, and the account re-enters the composite at the beginning of the month, which follows the cash flow by at least 30 days. Additional information regarding the treatment of significant cash flows is available upon request.

Brookmont's returns do include reinvestment of dividends and are shown gross-of-fees. All transaction costs are included. The Russell 1000 cumulative return includes reinvestment of dividends and capital gains. During a rising market, not reinvesting dividends could have a negative effect on cumulative returns. There is no representation that this index is an appropriate benchmark for such comparison. You cannot invest directly in an index, which also does not take into account trading commissions and costs. The volatility of this index may be materially different from the performance of the strategy.

Brookmont Capital Management claims compliance with the Global Investment Performance Standards (GIPS®). GIPS® is a registered trademark of CFA Institute.
